PROJECTS

Gadxtreme (gadget e-commerce Project)

Technologies: React.js, Tailwind, sslcommerz, axios, JWT, TanStack Query, Firebase Auth, Node JS, Express JS, MongoDB

[Live Link](#) | [Client](#) | [Server](#)

- Gadxtreme is a responsive e-commerce project with secure login, fast loading, a Swiper carousel, and AOS for seamless browsing.
- Users can add products to their cart, purchase via SSLCommerz, manage their dashboard, view order history, and track pending reviews.
- Admins have a separate dashboard to manage users, assign roles, and update order statuses (e.g., pending to delivered).
- Real-time pricing updates, quantity adjustments, along with filters by price, sorting options, pagination, and many other features.
- Buyers can leave reviews once their order is delivered.

Blog Application (Modern Blogging Platform)

Technologies: React.js, Redux, emoji-picker-react, Tailwind, Node.js, Express.js, axios, JWT, TanStack Query, Firebase, MongoDB

[Live Link](#) | [Client](#) | [Server](#)

- The Blog Application is a modern web app that allows users to create, manage, and interact with blog posts.
- Logged-in users can like/unlike any blog, with the total like count displayed on each post. The commenting system allows emoji usage, with anonymous comments for non-logged-in users and editable comments for logged-in users.
- It features category-wise filtering, blog search, a responsive beautiful mobile-friendly design, and bookmarking for later reading.
- User-friendly design with image upload functionality via ImgBB for an enhanced experience.

MealPlaterz (Share Food through Community)

Technologies: React.js Library, stripe.js, Tailwind, Material-UI, daisyui, JWT, TanStack Query, axios, Node.js, Express.js, MongoDB, Firebase.

[Live Link](#) | [Client](#) | [Server](#)

- It is a food-sharing platform where users can add food items with expiration dates and times, ensuring timely claims.
- The platform features real-time booking updates, food sorted by quantity and expiration.
- Users can leave reviews after successful deliveries, and expired items are marked to prevent claims.
- Premium membership via Stripe includes free delivery and countdown timers to track membership duration.
- Secure access is provided with JWT, and performance is optimized through pagination.

EXPERIENCE

NestedFor

Frontend Developer (Intern)

Nov 2024 – Jan 2025 (3 months)

Built responsive frontend designs and Shopify apps with React.js and Polaris. See two designs here: [Trip Dashboard](#) and [Displate Demo](#).

EDUCATION

B.Sc. Engineering in Information and Communication Technology (ICT)

Mawlana Bhashani Science and Technology University

February 2019 – May 2024
